

METROPOLITAN COMMUNICATIONS AIMS TO IMPROVE GOVERNMENT AND PUBLIC SAFETY

Partnership with Industry Leader ESI, Inc. Will Bring Complete Wireless Communication Solutions to Local Municipalities

EXTON, PA – Local wireless communications specialist Metropolitan Communications is partnering with Estech Systems, Inc. (ESI), an innovative leader in digital and IP business communications systems, in order to better serve municipalities in the greater Philadelphia area.

Local municipalities and counties, public safety organizations, and police and fire departments can now take advantage of the best option for powerful, easy to use communication solutions and servers.

ESI's Communications Servers offer features like Voice over IP (VoIP), voice mail and auto attendant, as well as support for applications such as presence management, call logging, Bluetooth voice integration, remote networking, and session initiation protocol (SIP) — while helping improve overall administrative efficiency.

"We're very interested in Metropolitan Communications as a partner because of the segment they represent and their decades-long presence in the market," said Pamela Hughes, Vice President of Sales and Marketing for ESI. "Our products are very well suited to the strong government and municipal foundations that they have created."

ESI has a strong background in providing government agencies with the latest innovations, including a recent partnership with the U.S. Department of Agriculture to help modernize its communications.

"ESI's long history of creating easy-to-use telecom products makes them an excellent partner and an excellent choice for this effort," said Dale L. Petrovitch, President and Chief Executive Officer of Metropolitan Communications.

About Metropolitan Communications

Founded in 1956, Radio Communications Service, and later Metropolitan Communications (1980) have together become two of the largest and most successful independent two-way radio shops in the tri-state area. Today Metropolitan Communications, Inc strives to provide the most cost effective and highly reliable wireless communication products and services attainable.

About ESI

ESI (Estech Systems, Inc.) designs and manufactures business communications systems and components. ESI's systems offer advanced technological design and ease-of-use, yet are very cost-competitive. The product line includes ESI Communications Servers, which support both digital and IP technologies in any desired combination. ESI's business communications systems are sold through hundreds of factory-trained Certified Resellers. Founded in 1987, ESI is a privately held corporation with headquarters in Plano, Texas. Any registered trademarks or trade names mentioned herein are the property of their products' or services' respective owners. ESI communications systems are protected by various U.S. Patents, granted and pending. Product details are subject to change without notice.
